

# Cyber Alert - Windows 10

---

Windows 10 users, Beware!!! Malware authors and cyber criminals are quick to mine trending topics over the Internet to trick people and infect their machines. Their trick is simple!!

**They create a fake e-mail** that looks and sounds as though it is coming from Microsoft.

The subject line may look like this “**GET YOUR WINDOWS 10 UPDATE**”. Such mails prompt the user to click a link sent by them. Users are urged to be cautious as such links download and install some form of Malware-that can lock the system and demand payment or spyware that collects and sends information.
